

ABSTRACT OF THE DISCLOSURE

Disclosed herein is an apparatus for fixing a connector
for an airbag module. The apparatus comprises a clip
5 integrally formed with a connector, and a connector bracket
attached to an airbag case. The connector bracket is inserted
in an insertion opening of the clip. The connector bracket
has an engagement hole formed at one side thereof so that a
hook of the clip is engaged in the engagement hole. The
10 connector is directly fixed to the airbag module by simply
inserting the connector into the connector bracket.
